## SUSTAINABILITY: THINK GREEN

The 'Think Green' slogan refers to our mission to carry out constant research for greener technology implementation and the use of renewable resources.

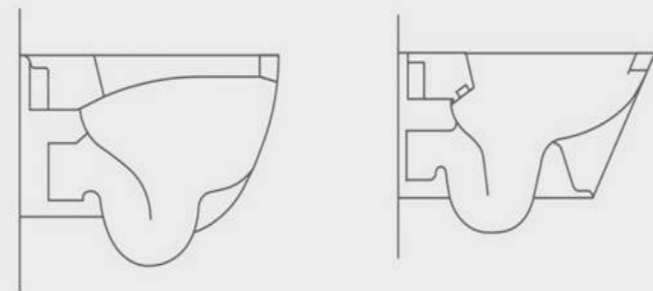

We implement strategies to:

- reduce environmental impact and resource consumption
- reduce energy consumption
- eliminate toxic substances or pollutants released into the environment

By creating sanitary ware designs that facilitate cleaning, we aim to reduce the use of detergents and excessive amounts of water and this together with improving the water efficiency of WCs, contributes to an overall reduction in water consumption. All round pre-production, production, transportation, use and recycling phases, are continuously monitored and improved.

# INSTALLATION STEPS OF SPLIT TOILET

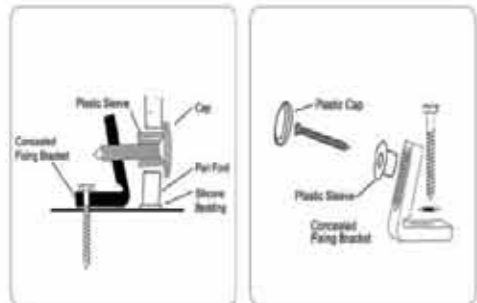

1 Position the water inlet, waste outlet and floor fixing bracket holes.

4 Align the pan back to the wall. 5 Connect pan spigot to pan collar. 6 Set up waste pipe and make sure the pipe is parallel to the floor.

10 Align and push fully assembled toilet back to the wall. 11 Install ceramic cistern. 12 position stop tap then connect rear water inlet valve to stop tap.

13 Connect the pan with foundation bolt. 14 Fix the pan by screwing the foundation bolt to the floor.
